Sustainable Development Goals

2

ZERO HUNGER

We address hunger insecurity by expanding access to protein. In addition to developing nutritional products, we provide strategic grants and food product donations to regional food banks serving our communities, and we are involved in collaborative partnerships with hunger-related organizations.

3

GOOD HEALTH AND WELL-BEING

Responsible nutrition is integrated into our company's purpose of raising the world's expectations for how much good food can do. Additionally, we are committed to improving the health of our employees by providing access to affordable health care coverage and providing supportive programming for various health and wellness issues.

4

QUALITY EDUCATION

Tyson Foods believes in lifelong learning and professional development through continual investment in our workforce. We aim, especially, to enable hourly employees access to English as a second language and extend financial literacy training to all employees. Enhancing both of these life skills helps employees better integrate into the communities where they live and work and better positions them to realize their full personal potential. We also provide grants for scholarships and other capacity-building programs to build skills and leadership qualities in the communities where we operate.

6

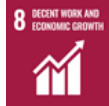

CLEAN WATER AND SANITATION

Water is a precious, finite resource that must be used and managed responsibly from farm to finished product. Food safety and quality is our top priority, and water is essential to producing safe food. We aim to balance responsible water stewardship with protecting the quality and safety of our products. We also aim to protect the health of communities who share water sources with us and, accordingly, have implemented stringent processes to comply with all federal and state regulations.

Sustainable Development Goals

Learn More

We work to ensure that employees receive fair compensation that is commensurate with their experience and skills, as well as to offer competitive compensation that takes local labor markets into consideration. Our employment policies and practices follow the human rights principles set forth in the United Nations Universal Declaration of Human Rights and the International Labour Organization’s Fundamental Principles and Rights at Work.
