ESG Data Center Endnotes

FOOD

*Our certifications include A2LA 17025 and ISO 9001-2015 as well as state certified labs at some of our beef and pork plants.

**In 2018, we voluntarily recalled 260 cases of Tyson Foodservice chicken product after being notified by a supplier that an ingredient sent to Tyson Foods may contain pieces of blue and clear soft plastic. This ensured that no affected product was sold in stores. Tyson Foods received no reports of illnesses associated with the affected product, and the U.S. Department of Agriculture has classified this as a Class II recall with a low health risk.

ANIMAL WELFARE

*Percentage acceptable of animals and trailers audited against [NAMI Recommended Animal Handling Guidelines \[June 2017 Rev. 1\]](#) for cattle and hogs and [NCC Welfare Guidelines for Broilers](#).

**We are committed to continuous improvement in animal welfare and our opportunity is to improve paw scores during winter weather. Paw condition can be impacted in winter weather by factors such as low temperatures and moisture. Our goal is to improve paw scores in winter months by five percent year-over-year. We will report our progress against this goal in our annual sustainability report.

ENVIRONMENT

Compliance Metrics

*These statistics are representative of all U.S.-based operations, excluding Cobb-Vantress, AdvancePierre, Original Philly, Tecumseh Poultry, American Proteins and Keystone Foods.

Water

*This footprint includes data from our U.S.-based operations. Information from our U.S.-based Cobb-Vantress, The Pork Group, hog buying stations, Tecumseh Poultry, American Proteins and Keystone Foods are not included in this footprint. FY2018 data includes AdvancePierre and Original Philly acquisitions, FY2016 and FY2017 data does not.

Energy and Emissions

*This footprint includes data from our U.S.-based operations, including The Pork Group and hog buying stations. Keystone Foods and the Grayridge elevator are excluded from all years of data.

- The first three columns of data (FY2016, FY2017 and FY2018) are aligned with information used to set our science-based target (SBT) that was approved in July of 2018.
- The final column of data (FY2018 with Acquisitions) represents the growth that has occurred at Tyson Foods since we set our SBT with the acquisitions of American Proteins (four rendering plants in Georgia and Alabama and 13 blending facilities located throughout the southeastern and midwestern U.S.); AdvancePierre Foods (10 facilities, two distribution centers and three support centers); Original Philly (two plants in Philadelphia, Pennsylvania); three Tennessee grain elevators; and North Carolina grain elevator.
- Next year, we will continue to expand our footprint with data from the acquisitions of Keystone Foods, Grayridge Elevator and BRF S.A. We plan to adjust our baseline to account for our continued growth in 2021.

Waste Generation

*This footprint includes data from our U.S.-based operations. Information from our U.S.-based Cobb-Vantress, The Pork Group, hog buying stations, Tecumseh Poultry, American Proteins, Original Philly and Keystone Foods are not included in this footprint. FY2018 data includes AdvancePierre. Landfill intensity is based on production locations.

*Beneficial reuse can include activities such as composting, land application and digestion.

WORKPLACE

Workforce

*U.S./Domestic employees only as of September, 2017, excluding AdvancePierre Foods.

Health and Safety

*Data includes Cobb-Vantress U.S. facilities. AdvancePierre Foods, American Proteins Inc. and Tecumseh Poultry are included in FY2018 but not prior years.
